

THYRISTOR POWER REGULATOR

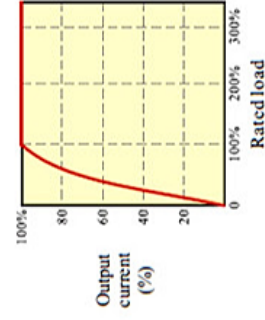

Standard type

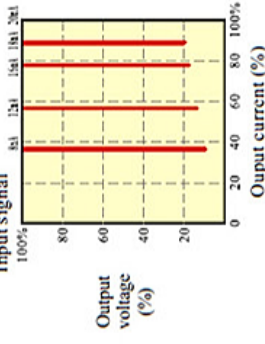

Constant voltage type

Limited Current type

Constant current type

Product series	W5	W5 series
Control	SP	Single-phase angle control
	SZ	Single-phase zero crossing control
	TP	Three-wire three-phase angle control
	TN	Four-wire three-phase angle control (Loads with Y connection, neutral point connection N)
	TZ	Two-wire three-phase zero crossing control
ZZ	Three-wire three-phase zero crossing control	
Main power voltage	1V	50-120VAC
	4V	200-480VAC
Normal rated current	030	30A
	045	45A
	060	60A
	080	80A
	100	100A
	125	125A
	150	150A
	180	180A
	230	230A
	300	300A
	380	380A
450	450A	
580	580A	
720	720A	
Dash	-	
Auxiliary power source code	1	1 φ 110VAC
	2	1 φ 220VAC
Input signal code	0	0-5VDC
	1	1-5VDC
	2	2-10VDC
	3	0-10VDC
	4	4-20mA
5	0-20mA	
M	Manual adjustment	
*	Special	
Buffering time code	C	Not have Buffering time (Zero-crossing type of product)
	J	Adjustable buffering time, 1-22 seconds (Phase-angle type of product)
Special code	TF	Inductive reactance type of loading
	CV	Constant voltage type
	CL	Limited current type (RMS limited current value cannot adjust)
	L/C	Limited current type (RMS limited current value can adjust)
	C/L	Constant current type (RMS constant current value can adjust)

Only for phase-angle type of product
